## **PROFORMA FOR SYNOPSIS:**

### **1. Title of the thesis**

### **2. Introduction: Giving purpose of research (in about 2-3 Page)**

### **3. Literature Review**

A brief review of the work already done in the field. Review of literature should be comprehensive covering various aspects of the proposed work but it must be precise with recent information. Detailed review at this stage is not required. It should include review of 20 – 30 research papers of last 10-15 years published in international and national Journals.

### **4. Objective (s) /Need of Study**

Noteworthy contributions in the field of proposed work. Researcher may indicate the conclusions, which are expected to be drawn from the proposed studies.

### **5. Hypothesis (If applicable)**

### **6. Work Plan & Methodology**

Step wise step proposed methodology during the tenure of the research work. Techniques in brief should be given in respect of specific experiments/observations only. Methods of routine nature need not be described.

### **7. References/Bibliography in standard format.**

## **TYPING INSTRUCTIONS:**

- The synopsis should have the following page margins
  - Top edge : 25 to 30 mm
  - Bottom edge : 25 to 30 mm
  - Left side : 35 to 40 mm
  - Right side : 20 to 25 mm
- Tables and figures should conform to the margin specifications. Large size figures should be photographically or otherwise reduced to the appropriate size before insertion.
- The general text shall be typed in Font Style “Times New Roman” and Font Size 12.
- The page numbering for all items 1 to 3 should be done using lower case Roman numerals and the pages thereafter should be numbered using Arabic numerals.
- References can be numbered as 1, 2, 3 etc in the order in which they are referred to in the body of the synopsis. Only those, which are cited in the synopsis, only need be given in the list of references.

OR

References can be listed alphabetically author wise. In the text, the reference should be quoted as Sen-Sarma (1980) or Sen-Sarma and Thakur, (1981) or Sen-Sarma et al. (1982) for single, two and more than two authors, respectively. Papers by the same author in the same year should be distinguished by letters, a, b, c, etc.

### **For Literature Review, following pattern should be followed**

**Ritu Lal et al. (2009):** Investigated the pharmacokinetics and tolerability of gabapentin enacarbil up to supratherapeutic doses and the effects of gabapentin enacarbil on cardiac repolarization in healthy volunteers, and to provide a dose reference for a future definitive QT/corrected QT (QTc) study and concluded that Gabapentin enacarbil was associated with dose-proportional gabapentin exposure at doses up to 6000 mg and was generally well tolerated in these healthy subjects.

**For references, following pattern should be followed.**
